SUMMARY

Aspiring undergraduate student in Computer Science with a strong interest in Cybersecurity and secure computing, seeking an academic environment to build a solid foundation in programming, algorithms, and system security. My goal is to develop strong analytical and problem-solving skills to understand, design, and protect modern computing systems while contributing to ethical and impactful technological solutions.

WORK EXPERIENCE

Bangladesh Red Crescent Society (BDRCS)

Volunteer & Assistant Coordinator (ICT, Media & Communication)
- Volunteered for over one year in community awareness programs on health, sanitation, and disaster preparedness.
- Assisted in humanitarian response during the Sylhet floods, supporting coordination and food distribution.
- Supported digital communication, media coordination, and team management as Assistant Coordinator, demonstrating leadership and teamwork skills.

PROJECT WORK

Mini OSINT Intelligence Dashboard

- Conducted an independent Open-Source Intelligence (OSINT) research project using publicly available data sources.
- Applied ethical investigation techniques including search engine operators (Google Dorks), social media analysis, and open databases.
- Developed analytical thinking, information verification skills, and cybersecurity awareness relevant to protecting digital systems.

CS50 Final Project – Harvard University
- Completed a final programming project as part of CS50x: Introduction to Computer Science.
- Applied core computer science concepts such as algorithms, problem-solving, and structured programming.
- Strengthened logical reasoning, coding discipline, and practical problem-solving skills through hands-on implementation.

EDUCATION

Higher Secondary Certificate (HSC) – Science

Govt. Bangabandhu College
- Board: Dhaka
- GPA: 3.75 / 5.00

Secondary School Certificate (SSC) – Science

Saratoil Muslim High School
- Board: Rajshahi
- GPA: 5.00 / 5.00

ADDITIONAL INFORMATION

- Technical Skills: HTML, C++, Python (basic scripting), Algorithms, Data Structures, Problem Solving
- Cybersecurity & OSINT: Open-source intelligence (OSINT), ethical investigation basics, information verification
- Security Exposure: Basic malware analysis concepts, understanding execution behavior and defensive awareness
- Languages: English (TOEFL iBT – 87), English Grammar and Communication Course – Mentor's, Bengali (Native)
- Certifications & Courses: CS50x – Harvard University; Advanced Malware Development – SpylerBD
